

# LendR Tokenomics Overview

## Token Name

LendR

## Token Symbol

LENDR

## Blockchain

Ethereum (ERC-20) or Solana (TBD based on scalability needs)

## Total Supply

1,000,000,000 LENDR

## Initial Distribution

- 25% - Community & Ecosystem Growth
- 20% - Founders & Team (4-year vesting, 1-year cliff)
- 15% - Strategic Partnerships
- 10% - Treasury & Governance
- 10% - Pre-Sale Round
- 10% - Public ICO
- 5% - Liquidity Pool
- 5% - Advisors (3-year vesting)

## Utility of LENDR

- Collateral for lending positions
- Tier-based access to better lending terms
- Governance and DAO voting
- Staking to earn yield

- Reputation tracking for lenders and borrowers

## **Incentive Model**

- Early adopters earn higher staking rewards
- Borrowers pay discounted rates using LENDR
- Lenders receive a portion of protocol fees in LENDR

## **Burn & Deflation**

- 1% of all interest paid is burned to reduce supply
- Buyback events funded by Treasury based on revenue milestones

## **Governance**

LENDR holders can vote on:

- Protocol upgrades
- Interest rate curves
- Collateral approval lists
- Treasury allocations
